

The WT4 Niche is designed for the WT4 LED light fitting. With inner IP68 cable gland and external 3/4 inch BSP thread for conduit fitting making a complete water tight seal. There is an Inner groove for water displacement.

The WT4 LED light has a silicon o ring which prevents the lamp from movement once fitted. But at the same time the lamp can be removed if necessary.

Niche Black Acetyl (optional)

Weight	Light	900grams
Rear		100 length X 100mm Diameter
Inner		M12 IP68 cable gland
Front diameter		120mm X 5mm thick
Rear cable secure		3/4 inch BSP thread for conduit.
Material		Acetyl

The niche should be installed prior to tiling or rendering. This could be core drilled out at a later date.

There is a 5mm lip around the front of the niche to allow for rendering or tiling.

At the rear of the niche there is a 3/4 inch BSP threaded for an IP rated conduit to be installed. This also protects the cable from damage.

A draw wire should be placed through the conduit and niche this should have free movement so no snags may occur.
